Filters

Floating skimmer

water surface cleaner

The skimmer head is floating on the water surface, an air pocket is ensuring it's best possible position. A thin film of water is sucked into the connected pump from the surface of the pond causing a current of water to flow into the skimmer. Coarse particles are trapped in the skimmer sieve and should be removed, as necessary. Dirt and small particles are fed to the connected pond filter to be filtered out of the water. By means of the 3 floats the skimmer adjusts itself to changes in the water level. The skimmer may be used in connection with a pump when feeding a waterfall or a flowing brook. A positive biological effect is achieved, due to the sucking off of the warm water at the surface of the pond, which causes the temperature at the base of the pond remains stable. This causes a decrease in the growth of algae. Material: black plastic

Article number: 168/002394

Technical Data:

Max. pond volume 1	approx. 2.000 - 12.000 l
Accessoires	required hose: Ø 25 mm (Art.-No. 168/066051)
Flow rate	approx. 30 - 100 l/min
Product measurement	250 x 176 x 200 mm (l x d x h)
Carton dimension	250 x 175 x 200 mm
Weight (gross)	1,65 kgs
Intake	1" / Ø 32 mm
	recommend pump performance: 2.000 – 6.000 l/h, for example Messner filter pump MPF 3000 (Art.-No. 156/001430), MPF 4500 (Art.-No. 156/001431) or MPF 6000 (Art.-No. 156/001432), please choose the suitable filter from our Delta line, for example Delta 4500 (Art.-No. 162/002423) or Delta 7500 (Art.-No. 162/002424)
Additional information	
Extent of delivery	Skimmer, 3 floats, 2 hose connection pieces
EAN-code	40 16881 00252-7
