Filters

Skimmer 200

water surface cleaner

The skimmer head is floating on the water surface, an air pocket is ensuring it's best possible position. A thin film of water is sucked into the connected pump from the surface of the pond causing a current of water to flow into the skimmer. Coarse particles are trapped in the skimmer sieve and should be removed, as necessary. Dirt and small particles are fed to the connected pond filter to be filtered out of the water. The large volume of the filter basket ensures long cleaning intervals. With the telescope stand it is possible to vary the installation height in a scale of 100 mm. Differences in the water level up to 120 mm are automatically equalized. For the operation in front of a gravitation filter the bottom of the housing should be removed and the skimmer can be fit on a tube (Ø 125 mm). A positive biological effect is achieved, due to the sucking off of the warm water at the surface of the pond, which causes the temperature at the base of the pond remain stable. This causes a decrease in the growth of algae. Material: black plastic

Article number: 168/002396

Technical Data:

Max. pond volume 1	approx. 30.000 l
Accessoires	required hose: Ø 32 mm (Art.-No. 168/066061)
Flow rate	approx. 50 - 300 l/min
Product measurement	Ø 200 mm, h min. 430 mm, max. 650 mm
Carton dimension	300 x 270 x 260 mm
Weight (gross)	1,95 kgs
Intake	1 1/4" / Ø 32 mm
	recommend Messner filter pumps MPF 3000 – MPF 13000 (Art.-No. 156/001430 – 1435 or M 15000 – M 40000 (Art.-No. 156/001414 - 1418) Please choose the suitable filter from our Delta line (Art.-No. 162/002423 - 2441)
Additional information	
EAN-code	40 16881 00629-7
